Program

Level I VTRA (Two-Day) Training School and Community Based Edition

Training Descriptor: The primary purpose of the Violence Threat Risk Assessment is to provide an established and practiced approach to assessing students who may be on a pathway towards violence and provide multi-disciplinary interventions that decrease the risk, prevent injury, and support students in receiving the help necessary to address the issues leading to high-risk activities.

The two-day training will provide participants with the steps and skills necessary to bring together education, police and community agencies to develop and successfully implement a community-based threat assessment protocol and multi-disciplinary, cross sector VTRA assessments.

The training will further entrench the VTRA Model and its foundational principals for participants who have received VTRA training and as a community are committed to protocol development and multi-disciplinary assessment.

Training Goals: Participants will leave with information that will enable them to apply the VTRA model to community based protocol meetings and the implementation of VTRA assessment objectives and strategies. Participants will hear about the conditions that are necessary to ensure protocol partners maintain rigorous assessment practices when assessing student behaviors.

Presenters
